

OUR CLIMATE OUR FUTURE

WHY YOUR SUPPORT MATTERS

Climate change is accelerating, threatening Australia's unique ecosystems and communities, resulting in rising sea levels and extreme weather events.

WWF-Australia collaborates with Indigenous and local communities to implement nature-based solutions that benefit both people and the planet.

ACTIONS YOU CAN TAKE

Opt for public transport, carpooling or cycling to lower greenhouse gas emissions.

Advocate for policies that transition Australia from fossil fuels to renewable energy sources.

Contribute to WWF-Australia's programs aimed at restoring ecosystems and supporting climate-affected communities.

Participate in local efforts to restore habitats and increase climate resilience.
